## *The Class of 1999 Dedicates the Yearbook to: The Century!*

As we look to the next millennium we reflect upon the many advances of this century. Improvements in society have made a great impact in our country. Civil rights have brought more equality to our nation as well as women receiving the right to vote. There have also been substantial developments in technology. Cars, televisions, computers, cellular phones, and pagers effect our lives on a daily basis. Science has progressed significantly over the past one hundred years. As Americans, we won the race to the moon and continue to expand our knowledge of space. Achievements in the medical field have led to the discovery of cures and treatments for many diseases.

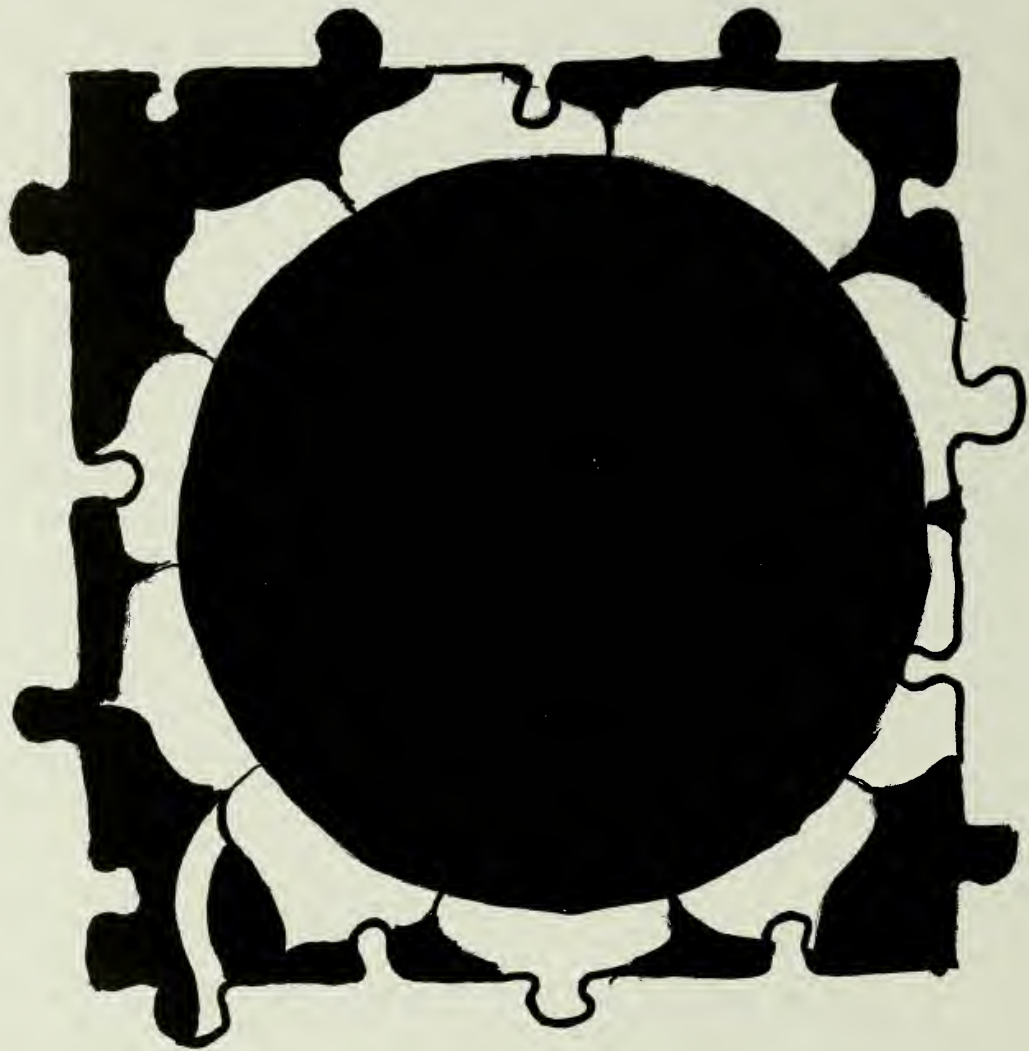

At this time we are not only looking to the end of the millennium, but also the end of the seniors' time at Fenwick. Significant changes have occurred in their four years here. Many important people have come and gone in this short time. A new principal has joined the Fenwick staff recently. Mr. Robert McNamara took the job when Mr. Ralph LeDuc, the former principal, turned his focus to the new fields. Last year we regretfully said good-bye to the former chaplain Fr. John Sutton; this year we are pleased to welcome Fr. Jim Daley. Bishop Fenwick has also progressed in technology. Each student has been privileged with access to the Internet. Another advancement in the technology at Fenwick is the newly built Zampell Technology Center. A major change affecting most of the students and staff at Bishop Fenwick is the fields and track added to the campus. Unlimited amounts of time and money have been contributed by all in order to construct the new track, tennis courts, and fields for all sports; it was a major accomplishment that required dedication from everyone involved. Just as our country has gone through many beneficial changes in the past century; Bishop Fenwick has also in the past four years. As the students continue to grow and mature with the changing times they allow the school to do the same.

People would like to think that there's somebody up there who knows what he's doing. Since we don't participate, we don't control & we don't even think about questions of vital importance. Let's hope this ship has a captain... Unfortunately he imposes on the people the feeling that they are incompetent to deal with these complex and important issues. His deep insights we are supposed to admire & and must happily & confidently assign the right to control our lives... confused yet?
